Hi, I would like to put in my quote to fit and weld the railings on the bridge proposed in prince Harry drive Henley

I spoke with Colin about this and agreed I would need assistance with this which he said he would be there to help strip out the old handrail and fit the new

My quote on this would be £2800 which includes materials and all consumables

I believe the council are supplying the railings but i may need to weld base plates on the posts to weld to the bridge to make it more stable

I would be available the beginning of December if you wish to go ahead with my quote

Kind regards

Brendan Bates
