

## OPTIONS FOR FOOTPATH BRIDGE – PRINCE HARRY ROAD

### **SECURE A FIELD**

#### **OPTION 9.2.1**

##### **A NEW BRIDGE**

Thanks for your enquiry and time during our conversation earlier.

As mentioned in our conversation, we offer fully certified (BS5400 part 2) pedestrian footbridges, ideal for use in public domain and sold under the brand “Bison Bridges”.

They are constructed from galvanised steel beams with typically either timber or recycled plastic deck and parapet.

Typical size is 1.2m width (DDA compliant) and spans from 3 – 10m with kits held in stock in 1m increments.

We can offer complete installation service including the removal and disposing of existing structure and the excavation and casting of new abutment foundations and footpath completion for step-free access and egress as required.

Explore more about us on: <https://www.bisonbridges.co.uk/>

In terms of budget, I would advise that the sort of figure that should be in your minds for a complete turnkey project with us on a bridge of 4m span would generally be in the region of **£10 - £15k + VAT**. Of course, this is all dependant on exact spec of the bridge; surroundings, existing structure, site access etc.

I hope this helps and would be happy to come to site for a detailed survey in view of arranging a detailed proposal once you are at that stage.

Kind regards,

**Doug Wilson**

**Installation Sales**

Secure-a-Field Ltd | Ridgefield Business Park | Beacon Road | Copt Oak | Loughborough | LE12 9YE.

For Sat-Nav please use LE12 9XN.

#### **OPTION 9.2.2**

##### **UPGRADING EXISTING BRIDGE**

##### **DJ STEEL FABRICATIONS**

To supply and fit the total of 38m of railings to the foot bridge galvanised £6,900.00 + VAT

To supply and fit the total of 38m of railings to the foot bridge galvanised and powder coated £8,100.00 + VAT.

I have attached a drawing of what the railing will consist of.

The prices includes the taking down of the wooden railings but not the removal of it.
