### **Quotation for Mole Control**

Standard Mole Control visits to Riverlands Play Area, including river-side footpath and grassed areas. As discussed during site visit with Clerk. (Approximately from Play Area downstream to second footbridge)

Areas to be assessed and traps laid as necessary. Tunnel traps to be used. These are buried in the mole runs - discrete and unlikely to draw attention from the public.

Costings are: £65.00 trap setting fee  
£5.00 per mole caught

As a guide, I would expect to catch 6-8 moles judging from the mole damage I saw during the site visit, however this cannot be guaranteed!

Unfortunately with the area being open to the public, I will have to charge £5 per trap for any traps stolen from the site.

Public Liability Insurance Certificate is included.
